The Würth Group is the global market leader in the development, production and sale of fastening and assembly materials

MASTERCRAFT

World market leader in the manufacturing of fastening materials

The Würth Group is the global market leader in the development, production and sale of fastening and assembly materials. It currently consists of over 400 companies in more than 80 countries and has more than 88,000 employees on its payroll, more than 41,000 of which are active in the sales force. According to the audited annual financial statement, the Würth Group generated total sales of EUR 20.2 billion in the business year 2024. A new record in sales.

In the core business, the Würth Line, the product range for craft and industry comprises over 125,000 products: From screws, screw accessories and anchors to tools, chemical-technical products and personal protection equipment. The Allied Companies of the Würth Group, which either operate in business areas adjacent to the core business or in diversified business areas, round off the range by offering products for DIY stores, material for electrical installations, electronic components (e.g. circuit boards) as well as financial services.

We are a family business

Four million customers all over the world trust in Würth today. Human beings and a very special corporate philosophy are the driving forces of the long-standing success enjoyed by the Würth Group. Würth is a family business that was founded by Adolf Würth in 1945. Prof. Reinhold Würth, today's Chairman of the Supervisory Board of the Würth Group's Family Trusts, took over the business at the age of 19 after his father had passed away and developed it further in the following years. Starting from the early years of the company in post-war Germany, he turned the former two-man business into a worldwide operating trading group.

Our philosophy

We owe it to Reinhold Würth that the Würth Group has a clear business orientation: It is marked by a strong brand policy, future-oriented product strategy, closeness to the customer, clear quality offensive, thinking in terms of visions and not least by a strong corporate culture. Bettina Würth, Reinhold Würth's daughter and Chairwoman of the Advisory Board together with the members of the Central Managing Board see to it that these values are filled with life and developed further.

About the wurth group

MASTERCRAFT

Why Würth new Zealand

New Zealand's partner in trade.

We proudly supply fixing and assembly products to the Automotive, Cargo, Engineering, Wood and Construction and Manufacturing Industries nationwide. From its humble beginnings, the Würth name has rapidly become the industry leader and the benchmark for competitors to follow. Our ability to respond quickly to market needs, with the support of a nationwide sales force, ensures that every single customer enjoys the level of service synonymous with the Würth name. We pride ourselves in being visionary-thinkers forcing us to go that extra mile to provide top-quality products complemented by excellent service. Our core range covers over 25,000 articles.

Würth has operated in New Zealand for over 35 years and employs over 350 people - 200 of them in our sales force scattered across New Zealand - and counting. Our sales force are strategically placed around the North and South Island, covering every city and town from Cape Reinga to Bluff.

Why wurth new zealand

MASTERCRAFT

A circular economy and climate neutrality are the key for sustainable growth that values and preserves the livelihood of our descendants. But how can we stop consuming resources?

The “take, make, waste” economic principle from the Industrial Revolution—which involves exploiting raw materials, manufacturing products, and then throwing those products away—not only consumes resources, but also produces high CO_2 emissions. Thanks to the circular economy, quality is now understood as retaining value instead of creating waste. This means taking into account the useful life across the entire product life cycle and adapting the product design so that it is possible to reclaim virtually one hundred percent of all materials used.

At the same time, this involves avoiding, reducing, compensating, and binding CO_2 emissions to effectively combat climate change. Product benefits, quality criteria, and workflows have to be fundamentally redefined, which will require a sustainable culture based on values and innovation. Circularity, climate neutrality,1 social justice, intergenerational justice: these are all values that point the Würth Group in the right direction for a sustainable future together with our customers, suppliers, and employees.

WÜRTH

Global focus on sustainability

MASTERCRAFT

» Climate-neutral and sustainable companies, products, and supply chains will be the new standard. «

ROBERT FRIEDMANN
Chairman of the Central Managing Board of the Würth Group

The 17 Sustainable Development Goals (SDGs) from the UN's Agenda 2030. They form the basis for ensuring global economic progress in line with social justice and within the scope of the earth's ecological limits.

WÜRTH

Global focus on sustainability

MASTERCRAFT

Quality is a decisive factor for any company in maintaining and increasing its competitiveness. Customers decide quickly whether the quality of a product and the performance of a supplier deserve their trust.

Our customers can have absolute confidence that each Wurth product is fit-for-purpose, top quality, durable and reliable, and has been subjected to tougher testing by us than it will ever face in real applications. Before any product is added to the range, it is subjected to several days of endurance testing in the Wurth Group's Test Laboratory, which is certified to DIN EN ISO/IEC 17025.

The central testing facility is supported by product testing operations in the USA, Europe and Asia, and the combined knowledge of each centre contributes to ensuring quality across the board.

In addition to our own quality assurance measures, Wurth New Zealand's suppliers also have an obligation to comply with our demanding quality standards, which extends to ensuring the most environmentally-friendly production possible.

WÜRTH

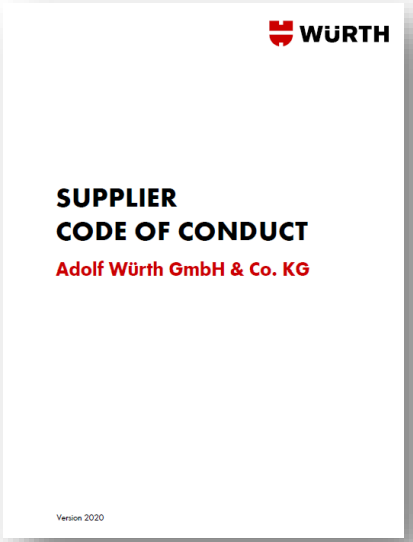

Our quality standards

Complying with current legislation is a matter of course for The Würth Group.

We are set by certain values that govern our dealings with each other and with our business partners. Mutual trust, reliability, honesty and straightforwardness, shown both inside our companies and to the public, are the fundamental principles deeply ingrained in the Würth Group's corporate culture. Furthermore, the way we run our business shall be in harmony with humanity and the environment, thereby contributing greatly to our long-term corporate success.

We consider these values to be a cornerstone of our supplier relationships. Wurth's Supplier Code of Conduct specifies binding minimum requirements that all our suppliers have to implement and comply with.
